

The World's Most Secure Portable Hard Drive.

The Data Locker™ features a comprehensive set of innovative, proprietary technologies in order to provide users with the simplest to use, most secure portable hard drive on the market.

The Data Locker™ is the only portable hard drive which is 100% platform independent, all of its security measures are performed within the device itself. Unlike other secure devices which require authentication through the host system, Data Locker™ users must authenticate themselves via a touch screen panel on the Data Locker™ to deactivate the security measures. Only after the authentication process is completed is the drive recognized or accessible by the host system. This allows the Data Locker™ to remain driverless and software free as well as being MAC and PC compatible.

The Data Locker's™ unique authentication system eliminates the threat of infected systems, keyboard loggers or brute force attacks. This authentication system coupled with hardware based 128 or 256 Bit AES / CBC Mode full drive encryption provide unparalleled security.

Technical Specifications:

Capacity* : 128GB SSD, 160GB, 320GB, 500GB, 750GB*, 1 TB*

Interface : USB 2.0

Dimensions : 5 Inch x 3 Inch x 0.8 Inch

Weight : 9 ounces

OS Compatibility : Compatible with any/all

Available Languages : English, Dutch, French, German, Japanese, Korean, Spanish

Data Locker Models:

Feature:	Personal	Pro AES	Enterprise
Encryption Algorithm	Proprietary Drive Lock	AES CBC Mode	AES CBC Mode
Encryption Key Strength	N/A	128 Bit	256 Bit
Master Administrative Password			•
Customized Security Policies			•
Self Destruct Mode		•	•
One Touch Data Eraser for Redeployment		•	•
Random Keypad (Shoulder Hack Defense)		•	•
Platform Independent Security Process	•	•	•
Driverless and Software Free	•	•	•
Mac and PC Compatible	•	•	•
USB Powered	•	•	•
Hardware Based USB Malware Protection	•	•	•
